(54) VEHICLE HAVING FORWARD-BACKWARD INTEGRATED PEDAL

(57) Abstract:

PROBLEM TO BE SOLVED: To provide a vehicle having a forward-backward integrated pedal capable of lessening fatigue of a driver and improving the traveling stability of the vehicle.

SOLUTION: A forward pedal 11 and a backward pedal 12 are integrally formed and disposed in such a manner as to be shifted longitudinally and laterally. A forward step 31 for supporting the heel of a driver's foot is provided in the rear of the forward pedal 11, and a backward step 21 for supporting the toe of the driver's foot is provided in front of the backward pedal 12. The forward pedal 11 is operated by placing the toe of the foot on the forward pedal 11 with the heel of the foot placed on the forward step 31, and the backward pedal 12 is operated by placing the heel of the foot on the backward pedal 12 with the toe of the foot placed on the backward step 32.
